PERFORMANCE CHART (log scale)

1) Allocation per end of month. 2) Performance prior to 16 August 2023 is based on backtest. Assumptions of backtest since August 2020: quarterly rebalancing, 5% cash allocation, Polkadot universe. The weights for crypto assets were determined to closely mirror the portfolio's allocation at launch of the AMC. The weight of an asset or assets, that did not exist yet, were redistributed proportionally among the assets that were already present at that time. Past performance does not guarantee future results.

Past performance is no indication of current or future performance. No guarantee is given that the investment objective of the Product will be achieved. The investment return and principal value of an investment will fluctuate so that an investor's units, when redeemed, may be worth more or less than their original cost. It is not possible to invest directly in an index. Exposure to an asset class represented by an index is available through investable instruments based on that index. There is no assurance that the investment product based on the index will accurately track index performance and/or provide positive investment returns. The index back-test returns shown do not represent the results of actual trading of investable assets.
