ACTIVE LONG/SHORT

FEBRUARY 2024

CRYPTO FINANCE
DEUTSCHE BÖRSE GROUP

MONTHLY COMMENT

In February, the Systematic DLT fund yielded a performance of 29.4%.

Crypto markets surged in February with BTC leading the rally. Bitcoin ETFs in the US recorded record net inflows of over \$6 billion during the month, leading to further supply shortage on the spot side.

The Systematic DLT took a fully long position in BTC and ETH futures beginning of February and maintained it throughout the month. The picking system also recalibrated and provided additional exposure to select Altcoins. This allowed the Systematic DLT to benefit significantly from February's market upswing.

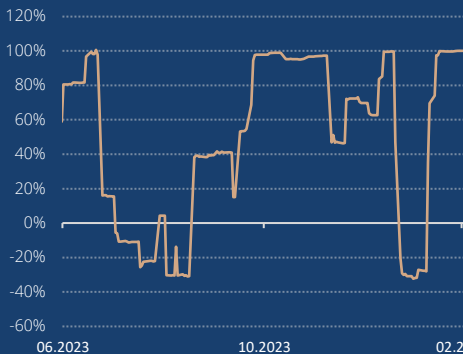

STRATEGY

The Fund performance demonstrates the automated trading system, based on an algorithmic approach with long and short indicators. This system is limited to a maximum of 33% short exposures. Investment decisions are made through generic, algorithmic filter analysis, which reduces the volatility of daily prices. This process allows trends to be identified and exploited without additional subjective analysis parameters from the portfolio management team.

The trend following strategies are stabilised by further quantitative methods, which include features of the price development. The model consists of a variety of different technical methods, such as trend following and mean reversion. The model further relies on additional short only indicators with the effect of efficiently reducing long exposure in a bearish market environment.

FUND EXPOSURE

Average exposure (daily)* 51.2%

*17 Jan 2019 to date

THE SYSTEMATIC DLT FUND

The investment objective of the Systematic DLT Fund is to maximise returns, regardless of the overall market performance of crypto assets. The actively-managed approach allows both long and short positions.

The Systematic DLT Fund, an alternative investment fund (AIF) regulated in Liechtenstein, pursues a systematic, quantitative approach based on daily market prices of crypto assets. To fulfill its investment objective in the most secure and transparent way, the Fund invests into the Bitcoin and Ether futures at the CME. The strategy may also invest directly into other crypto assets according to market environments.

KEY BENEFITS

Professional FINMA regulated asset manager

Weekly liquidity

Diversification from traditional investments

Upside benefit, downside protection

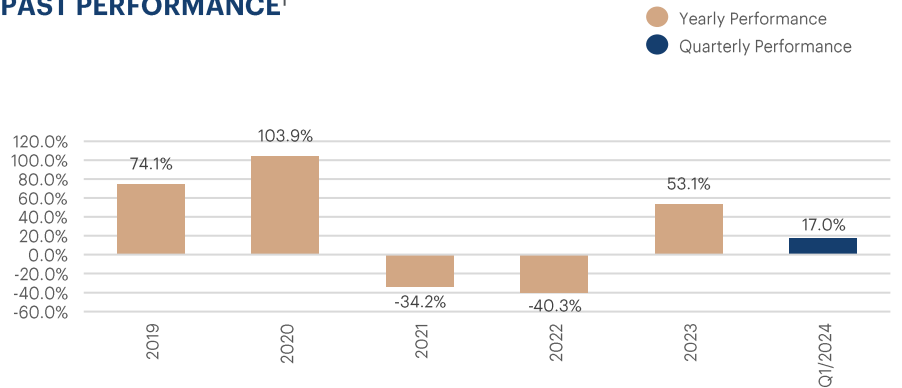

Regulated custodian

Invest directly with fiat currency

CRYPTO FINANCE

DEUTSCHE BÖRSE GROUP

ABOUT CRYPTO FINANCE

The Crypto Finance Group was founded in June 2017 and provides transformative financial services in crypto and blockchain technology for institutional clients. The group provides a full suite of professional digital asset financial services: Asset Management, Brokerage, Storage Infrastructure & Tokenisation.

Our Asset Management is the first FINMA-regulated crypto asset manager for collective investments and allows traditional investors to participate in the emerging digital asset class with professional, secure, liquid, and transparent exposure. Regulated crypto exposure is provided through traditional investment vehicles: All Crypto Finance (Asset Management) AG products meet the due diligence requirements of traditional funds, and investors benefit from several unique advantages, including easy and secure access and leadership in the sector.

RISK AND REWARDS

The Fund is considered to be a high-risk investment as the average return volatility is above conventional assets. Furthermore, crypto assets are based on a new technology that brings disruptive potential, but also unconventional risks. This requires a corresponding risk tolerance and capacity. The value of the Fund unit may fall below the purchase price. Legal, structural and market participant changes have an effect on the value of the portfolio. The Fund exclusively invests in less liquid assets that may be difficult to sell in distressed markets. Crypto assets are considered as carrying high risk profiles. A detailed and comprehensive list of risk descriptions can be found in the Prospectus available upon request.
